BOTTOM ENTRY SEAL REMOVAL

AVAVAVA 4.) Remove two opposing (~180° apart)

seal mounting bolts.

ST SEAL SHOWN Shaft Attachment (set screws shown (may or may not be from the shaft. threaded attach) Jacking screw holes Shaft Bore Seal bolt holes Set-Up Clips (may appear different) Shaft O-Ring Bore O-Ring

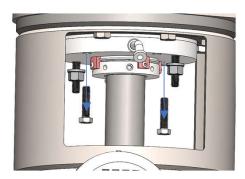

> Do NOT use seal piping for lifting.

3.) Follow the seal manufacturer's Barrier/Buffer Port instructions for detaching the seal

6.) Remove the remaining seal mounting bolts.

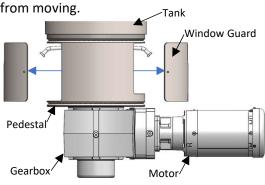

VARNII

Seal is heavy; keep body parts clear of pinch points.

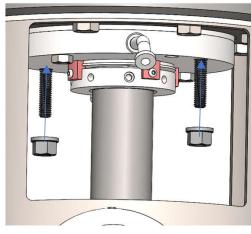

7.) Use the provided jacking screw holes to ease the seal out of the bore. Tighten the jacking screws evenly. Allow for the seal to rest on the threaded rod's nuts. The seal is now "floated". Do NOT use the jacking screws to tighten the seal to the nuts on the threaded rod. Tightening the seal to the nuts won't allow for the seal to "float". The jacking screw are just for breaking the seal loose from the

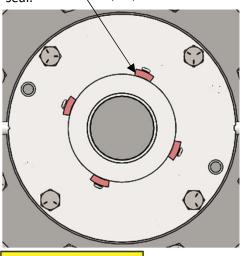

1.) Remove the window guard(s) from the pedestal. Also remove any piping from the seal that would prevent it

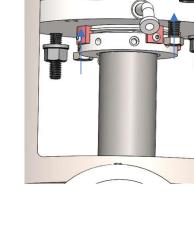

5.) Replace the two seal mounting bolts with threaded rod and nuts. Do not tighten the nuts onto the seal surface. Leave a gap of $\sim 1/2$ ".

2.) Install the seal set-up clips onto the Set-Up Clips with screws seal.

bore.

POWER SOURCE BEFORE ASSEMBLING, LIFTING, MOVING, OR SERVICING MIXER.

CAUTION:

PG. 1 OF 2 THE VISCOSITY AND SPECIFIC GRAVITY OF THE FLUID AFFECTS MIXER SIZING AND SPECIFICATIONS

HANDLE SEAL WITH CARE, DO NOT SET SEAL DOWN ON THE SEAL'S NON-METALLIC SURFACES

BOTTOM ENTRY SEAL REMOVAL

8.) Loosen the jacking screws so they don't protrude out of the tank side of the seal's face. Detach the shaft from the gearbox by following the appropriate

Fusion manual section.

Not Protruding

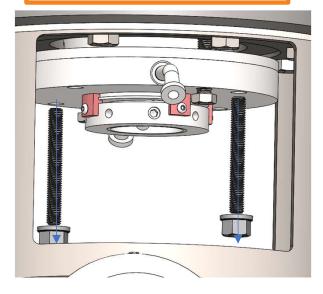

9.) Lift the shaft up and out of the gearbox, seal, pedestal, and bottom of the tank. Rig the shaft for installation in a way that adheres to this image.

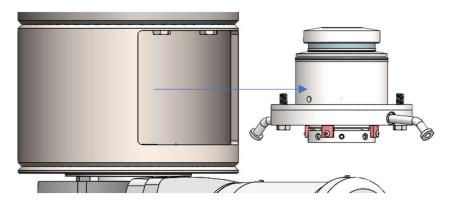

10.) Remove the nuts then threaded rod to remove the seal from the pedestal. Support the seal to prevent it from falling.

AWARNING

 Seal is heavy; keep body parts clear of pinch points.

11.) Remove the seal out the pedestal window and remove the jacking screws.

12.) To re-install the seal refer to "QSG-150 – Flow Bottom Entry Seal Installation". Start at step 1 and follow the procedure for the "Registered Pedestal to Tank" variation.
